🎓 EDUCATION

BA, Al Quds Open University

Aug 2015 – Dec 2020 | Rafah, Palestine

Computer Information Systems

👤 ABOUT ME

I am a highly skilled Frontend Developer with profound expertise in React.js, focused on building flexible, reusable components and crafting smooth user experiences. I excel at integrating APIs to develop dynamic, high-performance web applications. I enjoy taking on new technical challenges, improving performance, and refining implementation details. I am confident in my ability to work effectively, whether leading projects or working within a cross-functional team. I thrive in collaborative environments and always aim to deliver meaningful, scalable solutions.

🛠️ WORK EXPERIENCE

Frontend Developer (React.js), Inovar Company 📍

Apr 2025 – present | Saudi Arabia

- Develop reusable, high-performance UI components using React.js.
- Integrate RESTful APIs and manage global state.
- Collaborate with backend teams to deliver seamless user experiences.
- Implement responsive design to ensure cross-device compatibility.

Frontend Developer, FoxyTech Company 📍

Sep 2022 – Jul 2025 | Istanbul, Turkey

- Develop responsive web interfaces from provided designs.
- Modify existing websites, ensuring responsiveness and compatibility.
- Collaborate with design and development teams on UI improvements.

Frontend Developer (React.js), Al-Qeeq Company 📍

Feb 2023 – Sep 2023 | Gaza, Palestine

- Developed and enhanced existing websites and dashboards using React.js.
- Integrated APIs and managed side effects with Redux-Saga.
- Collaborated on UI improvements and ensured responsive design.

React.js Developer, Ajyal Incubator 📍

Oct 2022 – Dec 2022 | Gaza, Palestine

Landing Page and Dashboard

- Built landing page and dashboard UIs using React.js.
- Integrated APIs with Redux for state management.
- Applied responsive design techniques.
- Worked collaboratively within a team.

Frontend Trainer, Safi Design 📍

Jun 2022 – Sep 2022 | Khanyounes, Palestine

Frontend Development (70 hrs)

- Trained on HTML5, CSS3, JavaScript, Bootstrap, and GitHub.
- Enabled students to build responsive interfaces through practical exercises.
- Provided ongoing mentorship to reinforce front-end development skills.

React.js Developer, GGateway 📍

2021 | Palestine

ProShop Store

- Developed the UI for an e-commerce web application using React.js.
- Integrated APIs and managed state with React-Redux.
- Ensured high performance of the website.
- Applied responsive web design techniques.

- CSS/3
- JavaScript
- Typescript
- jQuery
- Bootstrap
- GitHub
- Sass
- Responsive design
- API integration
- Styled-component
- Redux-thunk
- React-router
- React-hooks
- React-Bootstrap
- TailwindCss

PROJECTS

Personal Website , Portfolio

Sep 2023 – Sep 2023

Designed and developed a custom personal website to showcase projects, skills, and professional background. The site features smooth navigation, animated sections, a responsive layout, and a functional contact form via EmailJS.

Technologies Used: React.js, Bootstrap, SASS, EmailJS, React Router, React Scroll, React Slick, Slick Carousel, React Icons, React On Screen.

Role: Created the website from scratch with a custom design, and implemented smooth transitions, scroll-based animations, and interactive UI components.

LobBox , Landing Page

Aug 2023 – Aug 2023

Developed a fully responsive landing page for a logistics fulfillment management platform. The page presents LobBox's key features, including smart inventory tracking, automated operations, and seamless integration with e-commerce platforms and shipping providers. The content highlights business pain points, system advantages, client statistics, and FAQs — all delivered with a modern, professional UI.

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AOS Library, Git.

Role: Translated Figma designs into responsive web layouts using Bootstrap, implemented email templates, and managed version control with Git.

Al-Huda University , Website

May 2023 – May 2023

Developed a responsive, pixel-perfect website for Al-Huda University, converted from an Adobe XD design. The website highlights the university's mission, vision, academic programs, and contact information — all presented through a clean and accessible user interface.

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AOS Library, Slick-Slider, Git.

Role: Translated XD designs into fully responsive layouts using Bootstrap and managed version control with Git.

Ajyal Incubator , Landing Page & Dashboard

Nov 2022 – Dec 2022

Designed and built a web app with a landing page and a dashboard for trainees, trainers, and admins. The dashboard includes role-specific access, attendance tracking, and evaluation features.

Technologies Used: React.js, React-Redux, Redux-Saga, Axios, Reactstrap, Formik, React-Router, React-Dropzone, Git.

Role:

- Developed a fully responsive dashboard and landing page.
- Implemented routing and role-based state management.
- Integrated APIs with Axios and maintained version control with Git.

Al-sharq Feloowship Program , Educational Website

Oct 2021 – Nov 2022

A multi-page web application designed for educational purposes, providing users with structured learning paths, mentorship features, quizzes, and personal dashboards. The project was built by converting a detailed Figma design into a fully responsive web experience.

Technologies Used: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Chart.js, Slick Slider, Git.

Role: Converted Figma designs into responsive layouts using Bootstrap, and managed version control with Git.

TOT Training , GGateway

Jun 2022 – Jun 2022 | Gaza, Palestine

- Completed **25 hours** of training on facilitation, session planning, and trainee engagement.
- Focused on practical skills for delivering effective and interactive training sessions.

View Certificate 

Front End Developer (React.js) , GGateway

May 2021 – Jan 2022 | Gaza, Palestine

- Completed **130 hours** of intensive hands-on training in **React.js** and modern frontend technologies.
- Participated in **70 hours** of freelancing skills development, including platforms such as Upwork, Fiverr, Mostaq, and Khamsat, with a focus on proposal writing, client communication, and portfolio building.
- Attended **25 hours** of professional English writing for tech communication.
